## Chapter 23 Transformations

Question	Answer	Extra information	Marks
23.1 (a) and (b)		<p>Shape A drawn with correct size and orientation</p> <p>Shape B drawn with correct size and orientation</p>	<p>1</p> <p>1</p>
23.2	Reflection in the line $y = x$	<p>Described as a reflection</p> <p>Correct mirror line</p>	<p>1</p> <p>1</p>

Question	Answer	Extra information	Marks
23.3		1 mark for correct size after enlargement	3
23.4 (a) and (b)		2 marks for completely correct shape B 2 marks for completely correct shape C	2 2

Question	Answer	Extra information	Marks
23.4 (c)	Any correct transformation, eg. a reflection in the line $y = x$ , translation by vector $\begin{pmatrix} 12 \\ 12 \end{pmatrix}$	Any two correct answers Bonus mark for both correct	2 1
23.5		Correct orientation after rotation Fully correct rotation Correct size after enlargement Fully correct enlargement	1 1 1 1
23.6	Enlargement, scale factor $-2$ , about $(0, 0)$	Enlargement scale factor centre of rotation	1 1 1

Question	Answer	Extra information	Marks
23.7	<p>Rotation of <math>180^\circ</math> about <math>(2, 0)</math></p>	<p>Rotation  <math>180^\circ</math>            About <math>(2, 0)</math></p> <p>If no marks scored, award 1 mark for a correct reflection seen for <math>Q</math> or <math>R</math></p>	<p>1 1 1</p>
23.8	<p>The point with coordinates <math>(6, 4)</math> is invariant</p>	<p>Complete method to show the transformations with the image correctly placed.  <math>(6, 4)</math></p>	<p>1 1</p>

Question	Answer	Extra information	Marks			
23.9	Line $L$ has a gradient of $-3$ Putting $3x + y = 0$ into $y = mx + c$ form gives $y = -3x$ This line also has a gradient of $-3$ so Sajid is correct	Rearrange $3x + y = 0$ to give $y = -3x$ Correct explanation	1 1			
23.10 (a)	<b>Length (<math>x</math> cm)</b>	<b>Frequency, <math>f</math></b>	<b>Midpoint</b>	<b><math>f \times</math> Midpoint</b>	20 or 360 or 90 Fully correct table	1 1
	$0 < x \leq 8$	50	4	200		
	$8 < x \leq 16$	30	12	<b>360</b>		
	$16 < x \leq 24$	20	<b>20</b>	400		
	Total	100		<b>960</b>		
23.10 (b)	$0 < x \leq 8$				1	
23.10 (c)	Estimated mean length = $960 \div 100 = 9.6$ cm	Divide total in the last column by 100	1			
		9.6 cm	1
