

<b>Identify/state/give</b>	Recall or select one or more piece(s) of information
<b>Define</b>	Give a clear meaning of a word or term.
<b>Calculate</b>	Produce a numerical working and show the relevant workings.
<b>Draw/plot</b>	Create a geographical representation of geographical information
<b>Label</b>	Add a label to a graphic, diagram, resource or image.
<b>Compare</b>	Identify the similarities and differences of two elements outlined in the question.
<b>Explain</b>	Give reasons for why something happens. You should also provide a justification or exemplification of your point.
<b>Suggest</b>	Apply your understanding to offer a reasoned explanation for why or how something may occur

## **Assess**

Based on evidence, determine the significance of something. Consider different factors and identify which are most important.

## **Evaluate**

Measure and judge the success of something. Review a range of information and come to a conclusion based on evidence.

## **Select... and justify**

Select an option from a range given and justify using the resources provided and your own knowledge and understanding. Explain why you have chosen one particular option rather than any of the others.
